

ON-SITE SKIN CHECKS

Skin cancer is the most common of all cancers. It is also the easiest to cure, if diagnosed and treated early.

Each year in the U.S. over 5.4 million cases of non melanoma skin cancers are treated in more than 3.3 million people.

THIS OFFERING INCLUDES

-  One-on-one consultations with a highly credentialed Dermatologist
-  The ability to ask questions or discuss concerns in a private setting, without leaving the office
-  Leave knowing if your concern is valid, and if you should see a primary care doctor soon

The Doctor is on-site typically for 2 to 6 hours depending on how many employees want to be seen. The evaluations are usually 5 minutes per person. The Doctor will not be taking samples, but they will be able to ease concern, and tell employees with experience and credibility, if they should seek further medical attention

Your office can choose if they'd like the Doctor to speak for 30 minutes on skin safety, then proceed with the 1:1 skin checks. Or just have the consultations and no group talk.
